

These are not golf shoes.

The only thing golfers like less than triple bogeys are soggy golf shoes. That's just one of many reasons why bunkers should drain quickly and completely.

The EPIC drainage system features larger drain holes and increased sidewall space as well as a patented gravity trap interface that will never plug with sand or debris. These innovations just might explain why all 76 bunkers at Sonoma Golf Club and most of the problematic bunkers at Winchester Golf Club were replaced with EPIC chambers.

Find out how easy and affordable it is to convert to the EPIC system. Call or click us today.

"If I were installing bunker drainage in an area of the country where heavy rainfall is common, there is absolutely no other product I would use." ~ Michael J. Kosak, General Manager, Sonoma Golf Club, CA
